2026 PRODUCT GUIDE

OVER 60 YEARS OF THE
BEST PRODUCTS BUILT
USING THE BEST PRACTICES.
THAT'S THE BEST WAY.

TO OUR VALUED CUSTOMERS

Since 1965, Best Way Stone has proudly stood as an independently owned and operated business built on a foundation of craftsmanship, quality and trust. For more than six decades, we have dedicated ourselves to delivering products that stand the test of time through style, durability, and the relationships we've formed along the way. At Best Way Stone, we believe that every product we produce is a commitment to you.

Being one of the few independently owned precast concrete manufacturers in the industry is more than just a distinction - it's what empowers us to deliver unparalleled service. Our independence ensures we remain flexible and responsive to the evolving needs of our customers by offering innovative solutions without ever compromising on quality.

Whether you're a homeowner transforming your outdoor space or a contractor seeking reliable, high-performance products to exceed client expectations, we're here to help bring your vision to life. Our pavers are backed by our lifetime guarantee, a testament to our unquavering commitment to you.

As we've grown, so too has our dedication to continuous improvement and exceptional service. Each member of our team is united by a shared mission: to provide you with an outstanding experience that is built on trust, innovation and craftsmanship.

Thank you for choosing Best Way Stone. We're here to support you - today, tomorrow, and for many years to come.

Warm regards,
The Best Way Stone Team

OUR TRUSTED DEALER NETWORK

BWS ProElite

Join the Best Way Stone family by connecting with one of our trusted dealers, conveniently located across Ontario, Quebec, the Maritimes, Michigan and Ohio. Our dealers don't just offer products, they bring your vision to life by recommending the perfect solutions, tailored to your unique design and style preferences. Whether you're planning a backyard oasis or a commercial project, our expert dealer network is here to guide you every step of the way.

Partnering with the Right Skilled Contractor

A well-crafted outdoor space begins with a skilled professional. Hiring a qualified hardscaper ensures that your project is executed smoothly and meets the highest standards. When selecting a contractor, consider these important tips:

Ask for references and past work: Review their portfolio to see if their style aligns with your vision.

Verify insurance, licensing, and warranty: Ensure they offer solid protection and guarantees for peace of mind.

Insist on industry-standard installation: Professional contractors should aim to adhere to best practices and guidelines recognized by the industry.

Consider choosing a ProElite Contractor, recognized by Best Way Stone for their commitment to quality craftsmanship. These select professionals work with Best Way Stone products and have a proven track record of delivering exceptional results. You can find our ProElite contractors at bestwaystone.com/find-a-hardscaper.

Professional hardscape contractors will understand the industry standards for installing hardscape products. You can download a copy of these guidelines by visiting masonryandhardscapes.org.

Visit our website to find a dealer near you:

WE HAVE A GOOD FOUNDATION

Best Way Stone's products are designed to be resistant to the elements, meeting or exceeding CSA and ASTM industry standards.

We select the best performing ingredients for our products. Partnering with suppliers who value quality and service first like us.

Our production team carefully inspects each unit of product before it leaves our factory. The commitment to quality is backed by our transferable lifetime guarantee on the structural integrity of our pavers.

Visit our website to learn more about our transferable lifetime guarantee:

Manufacturing Leads Design

Hardscaping solutions should be designed to last. Our philosophy is that manufacturing processes should always influence product design.

Thoughtful Innovation

Our production facilities are equipped with technology for our own proprietary processes that are specifically engineered to ensure our products are well-planned, well-designed and well-man.

With two state-of-the-art facilities, as well as dealers across Ontario, Quebec, the Maritimes, Michigan and Ohio, Best Way Stone is completely independent and able to both hear and respond to your needs.

THE PURSUIT OF BETTER

OUR TECHNOLOGIES

DesignLoc® technology is a two-stage manufacturing process that creates a refined surface while reinforcing a stronger, coarser base. This process enhances durability and reduces the potential for colour fading, ensuring a long-lasting, high-quality finish.

ChromaTec™ is a factory-applied protective surface enhancer that creates a barrier against stains from external elements. This coating not only helps to resist staining but also enhances the vibrancy and colour longevity of the product.

NanoBlast™ is a fine shot-blasting process that exposes specially selected aggregates on the product's surface. Combined with a brushed surface treatment, NanoBlast™ creates a striking textural contrast while delivering a more slip-resistant and comfortable finish.

EXPLORE BEST WAY STONE'S SERIES OF PRODUCTS THAT PROVIDE THEIR OWN UNIQUE ADVANTAGES TO YOUR SPACE

CLASSIC SERIES

The Classic Series represents the foundation of timeless design. These products focus on simplicity, durability and functionality. Perfect for budget-conscious projects, the Classic Series delivers reliable performance without unnecessary embellishments – ideal for creating simple clean spaces.

SIGNATURE SERIES

The Signature Series elevates design with superior quality and refined finishes, thanks to Best Way Stone's innovative DesignLoc® technology. These products combine enhanced durability with style, perfectly balancing aesthetics and functionality. Whether you're designing a residential oasis or a commercial space, the Signature Series delivers exceptional detailed results that stand out without compromising practicality.

PREMIERE SERIES

Best Way Stone's Premiere Series sets the standard for luxury and innovation. Utilizing advanced technologies like NanoBlast™ and ChromaTec™, this features high-end materials and cutting-edge manufacturing techniques. These premium products deliver unparalleled aesthetics and enhanced performance. Designed for those who seek to create truly remarkable spaces, the Premiere Series is where innovation meets elegance.

GEOCERAMICA®

Porcelain + Paver

THE BEST OF BOTH WORLDS

PATTERN

NOTES

EcoFlow® delivers a clean, modern and sophisticated aesthetic. Manufactured using DesignLoc® technology, the two-step manufacturing process creates a refined top layer while reinforcing a strong, durable base. EcoFlow® is designed to have strategic spacer bars that create greater infiltration between units, enabling efficient water drainage meeting CMHA specifications.

For pedestrian and/or vehicular use.

NOTES

A single-sided split face wall, with a double-sided option. Regular and tapered blocks can be split along back joint to remove smooth face and create double-sided finish.

Can be installed vertically or set-back, front-facing or reversed, or any combination.

Alternate a full 4 corner column row of the same indicated corners (Rights / Lefts) to make a 19.5" x 19.5" column base.

Maximum height with set-back: 48"
Maximum height without set-back: 30"

NOTES

For pedestrian and rooftop terracing use only. Provides a smooth white surface for maximum reflectivity. Meets SRI LEED® requirements for low slope roofing of 82+. Special order item, minimum quantities and lead time required.

When installing slabs on a pedestal set, ensure to consider load requirements. Refer to a project engineer for specific considerations.

Special order available for 45mm & 60mm.

PATTERN

Provides optimal performance

NOTES

EcoFlow[®] delivers a clean, modern and sophisticated aesthetic. Manufactured using DesignLoc[®] technology, the two-step manufacturing process creates a refined top layer while reinforcing a strong, durable base. EcoFlow[®] is designed to have strategic spacer bars that create greater infiltration between units, enabling efficient water drainage meeting CMHA specifications.

For pedestrian and/or vehicular use.

INSTALLATION GUIDES - SLABS & PAVERS

SLAB INSTALLATION TYPICAL CROSS SECTION

- 1 Best Way Stone® precast concrete slab (1.77'+) (45mm+)
- 2 Sand joint fill
- 3 Bedding Sand 1" (25mm)
- 4 Geotextile 12" (300mm) wide
- 5 Plastic edge
- 6 Extra width equal to foundation thickness
- 7 Lawn
- 8 Nail
- 9 Compacted aggregate base 0 3/4" (0-20mm)
- 10 Geotextile
- 11 Subgrade

SLABS ON PEDESTAL SET

- 1 Roof deck
- 2 Waterproof membrane
- 3 Protection board
- 4 Rigid insulation
- 5 Adjustable pedestal
- 6 Best Way Stone® precast concrete slab (1.77'+) (45mm+) thickness conforming to ASTM C 1782 and CSA A231.1
- 7 Best Way Stone® precast concrete slab (1.77'+) (45mm+) thickness conforming to ASTM C 1782 and CSA A231.1
- 8 Roof drain

When installing slabs on a pedestal set, ensure to consider load requirements. Refer to a project engineer for specific considerations.

TYPICAL PAVER CROSS SECTION WITH PLASTIC EDGE

- 1 Best Way Stone® precast concrete paver 2 3/8" (60mm) thick min.
- 2 Sand joint fill
- 3 Bedding Sand 1" (25mm)
- 4 Extra width equal to foundation thickness
- 5 Lawn
- 6 Plastic edge
- 7 Nail
- 8 Geotextile
- 9 Compacted aggregate base 0 - 3/4" (0-20mm)
- 10 Subgrade

INSTALLATION GUIDES - PERMEABLE PAVER SYSTEM

SEGMENTAL PERMEABLE PAVEMENT - FULL EXFILTRATION

- 1 EcoFlow® Permeable Paver by Best Way Stone®
- 2 Joint filling material ASTM No 8 (CSA 2.5-10mm) aggregate
- 3 Bedding course 1 1/5" to 2" (40 to 50 mm) ASTM No 8 (CSA 2.5-10mm) aggregate
- 4 Base course 4" (100mm) ASTM No 57 (CSA 5-28mm) aggregate foundation thickness
- 5 Subbase course ASTM No 2 (CSA 40-80mm) aggregate
- 6 Geotextile
- 7 Subgrade
- 8 Concrete edge

SEGMENTAL PERMEABLE PAVEMENT - PARTIAL EXFILTRATION

- 1 EcoFlow® Permeable Paver by Best Way Stone®
- 2 Joint filling material ASTM No 8 (CSA 2.5-10mm) aggregate
- 3 Bedding course 1 1/5" to 2" (40 to 50 mm) ASTM No 8 (CSA 2.5-10mm) aggregate
- 4 Base course 4" (100mm) ASTM No 57 (CSA 5-28mm) aggregate foundation thickness
- 5 Subbase course ASTM No 2 (CSA 40-80mm) aggregate
- 6 Geotextile
- 7 Subgrade
- 8 Concrete edge
- 9 Perforated drain connected to drainage system

SEGMENTAL PERMEABLE PAVEMENT - NO EXFILTRATION

- 1 EcoFlow® Permeable Paver by Best Way Stone®
- 2 Joint filling material ASTM No 8 (CSA 2.5-10mm) aggregate
- 3 Bedding course 1 1/5" to 2" (40 to 50 mm) ASTM No 8 (CSA 2.5-10mm) aggregate
- 4 Base course 4" (100mm) ASTM No 57 (CSA 5-28mm) aggregate foundation thickness
- 5 Subbase course ASTM No 2 (CSA 40-80mm) aggregate
- 6 Geotextile
- 7 Subgrade
- 8 Concrete edge
- 9 Perforated drain connected to drainage system
- 10 Impermeable membrane

INSTALLATION GUIDES - RETAINING WALLS

a. EXCAVATE THE AREA

1. Check for existing utilities or structures in the area of construction.
2. Dig a trench. Calculate the width of the area by adding 6" of space before the face of the wall, and 12" behind the wall block.
3. Calculate the depth of the trench by the burial depth of the wall. Consider that good practice is to have at least 10% of the total wall height buried below final grade.

b. PREPARE THE FOUNDATION

1. Cover the back and the base of the trench with geotextile. Extend the geotextile along the back of the excavated area to eventually above the drainage fill once in place at the top of the wall.
2. Spread 0-3/4" (0-20mm) stone in the trench, and compact using a vibrating plate compactor or a jumping jack. Make sure your area remains level after compaction. The compacted area must be at least 6" (150mm) thick. Add more stone if needed and compact again.

c. CONSTRUCT THE FIRST COURSE

1. Begin placing your first course of the Best Way Stone blocks along your leveled pad. Ensure the alignment and level are consistent.
2. The desired exposed face of the wall must be placed side by side with each block touching the next. There should be no space between block faces of the exposed side of the wall.
3. Add a perforated drain pipe at the back of the wall on top of the leveled stone base. Ensure to connect this pipe to the existing drainage system keeping water from accumulating behind the wall.

d. ADD THE BACKFILL

1. Add 0-3/4" (0-20mm) clean stone backfill to the rear of the wall, burying the perforated drain pipe. Ensure the geotextile remains along the backside as you backfill all the way up the wall, and does not fall into the backfill material.
2. Level the clean stone before constructing the next course. Ensure to fill all voids in the back of the wall with backfill.

e. THE REMAINING COURSES

1. When constructing the remaining courses ensure to clean off the top of blocks of the previous row. Make sure the blocks are installed with the appropriate side facing up following the locking system.
2. Backfill behind each constructed course with the same clean stone.
3. In order to maximize the strength of the wall, ensure that the joints of the row being constructed do not align with the row directly below or above. The joints of a course should match alternating courses.

CARE & CONSIDERATIONS

SETTING A BASE

The quality of work put into establishing a solid foundation is vital to the overall performance of your landscape design.

When properly constructed, a solid base foundation helps prevent paver settling, shifting, and water accumulation. Use of edge restraints and jointing sand is recommended as best practice by CMHA (Concrete Masonry & Hardscapes Association).

When choosing and installing jointing sand, please ensure to follow the directions given by the manufacturer. To find out more about base preparation and installation practices, visit masonryandhardscapes.org.

COLOUR DISTRIBUTION

When installing stone, we recommend you select a mix of materials from several different bundles to ensure a balanced distribution of surface colour textures and colour mixtures.

Always verify colours and products chosen for your concrete landscape project with your contractor or landscape designer prior to installation. Physical or printed colour samples are only representations of the chosen product. If you notice a discrepancy, notify us immediately before continuing with your project. Full installation is understood as your acceptance of the product's condition.

CONCRETE CARE

Maintaining the surface of your concrete pavers is essential to their aesthetic. Sealing your concrete pavers can enhance the colour, but it's optional as our pavers are just as durable with or without the addition of sealants. If you plan on sealing your concrete products, always follow the manufacturer's instructions for proper application.

Unfortunately, even materials as durable as concrete can scratch, chip, or stain if handled incorrectly. When compacting our pavers, ensure that a rubber membrane is added to protect textured surfaces from potential damage. Use a rubber blade when removing snow from the surface of our pavers to prevent surface scratching and damage. Best Way Stone is not responsible for the damage left by the misuse of compaction or snow removal equipment.

EFFLORESCENCE

Efflorescence is that white, powdery substance that appears on the surface of concrete and it's a naturally occurring process. Efflorescence does not affect the structural integrity or strength of the product and will usually wear off over time – although special cleaners can be used to speed up its removal. For more information visit masonryandhardscapes.org.

CHOOSING A CONTRACTOR

Although not required, hiring a qualified contractor makes installing stone a much more efficient and less stressful experience. When hiring a qualified professional, we recommend they follow industry standard guidelines.

When hiring a contractor, we recommend collecting project references and samples of previous work. Make sure they offer a comprehensive warranty, and have all the required insurance and licenses. Any contractor will understand the industry standards for installing stone - you can download a copy of these guidelines by visiting masonryandhardscapes.org.

SAFETY PRECAUTIONS

CAUTION! Product strapping under extreme tensions

Cut straps are sharp and may result in severe physical injury if proper precautions are not taken. Removal and handling of straps must be done with caution while wearing necessary protective equipment (Gloves, Goggles, Safety Boots, and Protective Clothing).

Concrete Materials must be cut in well-ventilated areas only. Use of a “Wet-Cut” Saw or other similar method is recommended to reduce hazardous dust production. Approved respirators, safety goggles, hearing protection, and gloves should be worn at all times.

Bundled material must always be transported and stored using appropriate equipment, meeting the regulations of local legislation (Transportation tie-down, vehicle weight limitations, and public storage location). Stacking more than two bundles on top of each other is not recommended.

Best Way Stone Limited® assumes no liability or responsibility for loss or damage resulting from the improper use or handling of our products, or from failure to follow instructions, warnings, and/or advisories on the product label and on the MSDS Precast Concrete Sheet (available upon request).

BEFORE OPENING ANY PRODUCTS:

Please check for correct colour and product (shape/size/design). Opening of this package (removal of strapping and/or shrink wrapping) assumes full acceptance of product by the purchaser. Material may not be returned or exchanged once the original packaging has been removed.

All concrete products may have significant colour variance between production lots. It is recommended that installation occur from multiple bundles simultaneously to ensure proper colour variance blending for both colour mixes and solid colours. In the case of a single-bundle installation, material should be installed from opposite ends of the bundle simultaneously.

Defective material delivered to the purchaser over the accepted norm will be replaced. (Please Note: Chipped and Cracked products are often used in areas where cutting is required. As such, please remove chipped or cracked products for this purpose). The purchaser must inform the manufacturer in writing within five days of delivery. Any materials in question must be available for inspection by Best Way Stone® before any credit or adjustment can be made.

PLEASE NOTE: If materials are completely or partially installed, they will be deemed acceptable and there will be no exceptions made for defective or unsatisfactory material.
